"Because ALL students can be Career Ready."

September 2017

Experiential Learning in this Classroom Doubles Employment Outcomes and Eliminates Behavior Issues

"In my class they know they have a job task that relates to the real world and they go do it."

David teaches Oxnard High School's Class which includes those students at risk, students with special needs and students who are severely handicapped (SH). His hands-on learning emphasis empowers his students and is creating an inspirational model for transition success. [Read more](#)

No More Behavior Plans

for These Engaged Students

David's hand-on teaching method has become a model for his district.

"We have a computerized program which is good but doesn't get the students out of their chairs."

"when you teach and modulate and get them on their feet, the behavior plans go away."

"I don't have any behavior plans - they come in with them, but they go away. Kids like to be up, not pushing a pencil and getting frustrated,"

"In my class they know they have a job task that relates to the real world and they go do it."

Exposure to Career Options: The Earlier the Better

To prime his kids for future success, David organizes his classes in two year sequences.

His 9th and 10th Graders are working with real tools to learn real skills to explore careers and intensively practice their skills in a safe and supported classroom environment. David calls this "Activated Learning". He has selected Project Discovery's hands-on career and life skills transition curriculum as a cornerstone because it offers a variety of careers for his students to try with real world tools.

According to David, "thirty minute lectures about a job bore my students to death. Without the hands-on experiences it becomes just a bunch of repetitive words to my students." David limits his lectures to 15 minutes of group discussion about the job - "15 minutes of power" -then he quickly "activates the class" with hands-on job skill practice.

David's 8 Tips for Developing Work and Life Ready Students

- Get students out of their seat and connect them to life skills.
- Work with real tools to learn real skills to explore a variety of careers.
- Intensively practice skills in a safe and supported classroom environment.
- Limit lectures to 15 minutes of group discussion about a particular job.
- Quickly activate a class with hands-on job skill

- practice.
- Make community connection for internship opportunities.
- if you get the students on their feet, the behavior plans go away.
- Have tools that are tested and aligned with required standards.

Win Over Your Students by Giving Them a Chance:

Sign up for a live webinar and all attendees will automatically be entered to win an iPad with our "Self-Advocacy" Solution Package pre-installed.
