

JOB EXPLORATION PACKAGE

 Hands-on &  Digital Materials

WEN Workforce
Excellence
Network
National Technical Assistance Provider

Help your students make more informed career and life decisions! Students develop real-life job skills with these exciting hands-on modules which are uniquely correlated to work-based job skills. Students will be exposed to a dynamic, hands-on career exploration program through the use of the Project Discovery curriculum. Students will use real tools of the trade to explore careers across multiple cluster areas. Engaging and motivating to users, this program utilizes evidence-based strategies that support learning for all student ability levels and positively impact outcomes for students with disabilities.

Approved and validated by the U.S. Department of Education and a National Dropout Prevention Network Model Program.
