

“INTERVIEWING FOR A JOB”

Multimedia Package

INSTRUCTOR’S NOTES

Overview:

The “Interviewing for a Job” Multimedia package is one in a series of 25 multimedia packages designed to instruct students in learning key job search, job survival and life skills needed to successfully secure and obtain employment and support independent living in the community. Each multimedia package is a stand-alone instructional unit on that topic area that can be used as a resource in a teacher-led or self-paced program setting.

A variety of formats have been included in this instructional package to accommodate different learning styles and retention strategies, including a DVD, PowerPoints, Activity Worksheets, and Handbooks.

Implementation:

The package provides over 12 hours of instruction on this content area in each of two levels. The package is competency-based—the knowledge, skills and behaviors that must be demonstrated for successful completion are provided. Please see the Scope and Sequence Chart for the process of using the different materials, along with the lessons and time frames.

The package may be used in a variety of instructional areas including career/technical education, special education, school-to-work transition, life skills, family and consumer science, employability/job readiness skills, work maturity, business education, and dropout prevention. Additional settings include Welfare to Work, juvenile justice correctional centers, adult basic education, family literacy, alternative education, out-of-school youth, and youth service centers.

Each package reinforces basic English, writing and math skills. Students are required to express themselves in complete sentences, to use correct grammar and punctuation, to spell correctly and to organize thoughts in an acceptable manner.

Differentiated Instruction:

While all students will experience the DVD in the package, the remaining instructional materials are provided at different reading levels and support differentiated instruction for a class of varying levels of learners:

1. 3rd-4th grade reading level materials for students with special needs or students at-risk (found in Section 2), and
2. 6th-8th grade reading level materials for students with special needs, students at-risk and the general population (found in Section 3).

Please see the Scope and Sequence Chart to see the process of parallel instruction using all the materials provided in the package.

Contents:

This multimedia package contains:

- Section 1:** **Instructor’s Notes** (containing the Scope and Sequence Chart, Competencies, pertinent Answer keys and Rubrics)

Scope and Sequence Chart:

The Scope and Sequence Chart below provides the process of activities for the lessons/materials in this package. Students with special needs will benefit from repetition and extra time to process new concepts. They also learn best when information is presented in a range of modalities. The following recommendation is made with an eye to pacing for an inclusive class.

- **First Column - Lesson Plan.** This column represents the plan of instruction using the materials in this multimedia package.
- **Second Column – Time Frames.** This shows the time frame based on approximately 50 minutes per day.
- **Third Column - 3rd-4th Grade Reading Level Activities.** This column represents the process of differentiated instruction activities for students who are working on an approximate 3rd-4th grade reading level.
- **Fourth Column - 6th-8th Grade Reading Level Activities.** This column represents the process of differentiated instruction activities for students who are working on an approximate 6th-8th grade reading level.

Assessment/Evaluation

There are many different assessment measures built into the package. For example:

1. *Pre-Post Tests* are provided for each different reading level in a PowerPoint format on the CD. (A hard copy is also in the binder).
2. The package is *performance-based*. The users will complete and demonstrate many of the competencies required (e.g., in class discussion, on the worksheets, and through role plays). Answers to the Worksheets are provided either in the binder behind the worksheet or see the Answer Keys section below.
3. In addition, *successful attainment* of many of the competencies must be shown in the user’s attitude, behavior, and interpersonal skills, such as maintaining regular attendance in class, being on time, being dependable, being part of a team, demonstrating good interpersonal relations,

effectively communicating, solving problems, etc. Many of the package activities will provide opportunities to assess the student's capabilities in these areas. Self-assessment activities are also provided for the user to examine his or her abilities and measure areas that need improvement.

4. *Rubrics* – are provided at the end of Section 1 to assist teachers in evaluating such areas as class participation, class projects, class presentations, writing assignments, written reports, oral presentations, role playing, etc.

Multiple Teaching Strategies

The packages successfully integrate many teaching strategies. They include: interactive discussion and questioning, cooperative learning, role playing, portfolio assessment activities, computer technology, community-based activities, self-assessment measures, brainstorming, and simulations.

Role Plays

The packages lend themselves to role plays to simulate situations encountered in getting and keeping a job. The teacher is encouraged to design role plays appropriate for the target population and students may help design the scenarios as well.

Community Activities

Linkages with the community can serve as a good resource for additional work/research in the topic area. It is a good idea for the teacher to develop a “pool” of area employers who are interested in being involved in the program and will allow participants to come to their places of business. By visiting face to face with employers, participants will have an opportunity to learn what knowledge, skills and attitudes employers look for when hiring potential employees and when retaining and promoting employees. If on-site visits are not possible, having area employers visit the classroom would be very beneficial. This will provide valuable insight to the users.

In addition, it would be helpful to invite parents into the classroom to provide real-life experiences and perspectives to the world of work. This will enable individuals to see the topics from both the employer and employee standpoints.

Recordkeeping

A minimal amount of time is necessary for recordkeeping. Each PowerPoint has a Score Report Form for the instructor to record student responses.

Competencies

The students working on a 3rd-4th grade reading level will receive an introduction and awareness of the skills needed to be successful in an interview situation. Thus their competencies are more broad-based. Students working at the 6th-8th grade level will receive more in-depth instruction in the content area and their competencies are more detailed and specific. The following are the overall competencies for this package:

1. Discuss the purpose of a job interview – *the purpose of a job interview is to allow the employer to meet you and decide if you are qualified for the job. It is also the time you find out about the job and decide if you are interested.*
