Students Show Huge Gains

Transition Outcomes: Alabama Students Dramatically Increase Scores on Career Exploration Post-Tests

In this edition of our 'Career News & Views' newsletter, we are showcasing student transition test score increases in Montgomery, Alabama!

Over the course of the 2018 - 2019 school year, students took 16 different career exploration courses focusing on vocational areas as diverse as Greenhouse Work, Child Care and Autobody Work. Teachers used Education Associates' hands-on kits, featuring **evidence-based practices** such as **video modeling** and **differentiated instruction**, to guide students through preparation for over a dozen different careers.

[See the Scores!](#)

Of the 131 students who completed Education Associates' Career Exploration curriculum, 102 (78%) showed improvements on post-test evaluations. Of those students showing improvement, the average gain was 105%, more than doubling their performance on the pre-test!
