Begin with the End in Mind!

Helping Students with Disabilities Successfully Transition into Adult Life

Across the nation, schools are finding success with a more effective approach to preparing students for post-secondary success. This means transitioning away from a traditional textbook-oriented attitude toward a hands-on strategy that integrates each student's strengths, preferences and interests into a tailored, career-driven education, beginning in middle school and continuing through high school and beyond.

Curriculum Matters!

While educators remain the most powerful scholastic influence on student development, having the appropriate resources can be a game-changer for students with disabilities. [READ MORE...](#)

Meet Students Where THEY Are

In order to teach content to learners at multiple stages of intellectual development, curriculum should contain multiple reading levels and other supports such as audio, visual schedules and video modeling. [READ MORE...](#)

Engage Students' Interest

Students, including those with disabilities, have a much higher chance of scholastic and employment success if they are excited by the relevance of their studies to their work. [READ MORE...](#)
